Subject: RE: Powerpoint presentation for cadmium?

Thanks Mike. We will plan on starting out the call with Cadmium because we don't really have any other solid agenda items on the call. If you aren't able to make it, I will cover it! Just let me know!

My other presentation meeting runs between 9 and 10 am Central time. I am not exactly sure when during the meeting I am presenting. I will try and find that out today. At the very least, I can provide you with the slides, but I might be able to give the presentation as well depending on the timing of my currently-scheduled presentation. The slides I will be putting together will be for a relatively short, bottom line presentation that will last probably 10-15 mins. I am trying to have them put together by late today.

Thanks,

Mike

Our call is at 9:30am Central. Would that time work for you to present to our states as well? If not, would you be able to circulate slides to me and I can work off them to give our states a presentation and refer them to you with questions/comments that come up? Otherwise, I will pull something together for Thursday by then!

Sorry about the short notice on this but I just thought I didn't want to wait until January after being prompted by the discussion on today's standards call that this was open for comment.

Candice,

I do not currently have a Powerpoint presentation for cadmium. I am putting a very short one together and will be giving a briefing Thursday morning to a region. I would be glad to also provide a briefing to your group as well. Just let me know. I will be working out of the office tomorrow and given my schedule on that day, may not be getting the presentation together before Thursday.

Thanks,

Mike

Mike-

Do you have any powerpoint presentations summarizing the basis of the new cadmium criteria? I would like to give our states a quick primer as to the new cadmium criteria (what data went into the criteria and how it affected the criteria values for freshwater) and thought it would be easier for me to do so if I had something to start with... otherwise I will cut and paste from criteria document. If you are able to let me know if you have something to share as soon as possible, I would really appreciate it (our call is Thursday AM so I am trying to get this done quick).

Any help you might be able to give would be appreciated!
